

FOR IMMEDIATE RELEASE

Solutions By Design II, LLC Awarded GSA Alliant 2 Small Business GWAC IDIQ Contract

Solutions By Design II, LLC awarded spot on General Services Administration Alliant 2 Small Business Contract Vehicle

Vienna, Va. – February 14, 2017 – Solutions By Design II, LLC (SBD) is pleased to announce that the General Services Administration (GSA) has awarded the company a spot on its 10-year, \$15 billion Alliant 2 Small Business (A2SB) Governmentwide Acquisition Contract (GWAC). The A2SB GWAC is a Multiple Award, Indefinite-Delivery, Indefinite-Quantity (IDIQ) contract to provide customized Information Technology (IT) services and IT services-based solutions across the federal government. A2SB gives federal agencies access to 81 small businesses providing integrated IT solutions creating the ability to stay on the forefront of the emerging IT landscape.

Similar to Alliant Small Business (ASB), this Next-Generation GWAC will include:

- A highly qualified pool of industry partners;
- A robust scope aligned with the Federal Enterprise Architecture (FEA) and Department of Defense Information Enterprise Architecture (DoD IEA);
- Access to a full range of comprehensive IT services and IT services-based solutions;
- Flexibility as emerging technologies and the definition of IT evolve;
- Ancillary support (non-IT) permitted when it is integral to, and necessary for, the IT services-based outcome;
- Open Season provision to competitively award to additional highly qualified IT contractors;
- A full spectrum of contract types, including cost reimbursement;
- Worldwide coverage; and
- Complimentary scope-compatibility reviews.

GSA is looking to build off of the success of ASB and create a contract vehicle that provides a total solution for agencies' requirements while maximizing opportunities for small businesses.

SBD is also a current awardee on the ASB GWAC as the Founding and Managing Member of SBD Alliant, LLC (SBDA). SBDA is one of the most successful organizations in the ASB program that was able to successfully recertify as small business during the 5-year option period. Throughout the life of the vehicle, SBDA has been awarded 20 Task Orders valued at over \$450M across 14 different agencies, ranking us 5th in terms of channeling work to the ASB vehicle.

“It’s extremely exciting to be a part of GSA's premier small business set-aside GWAC, not only the first time around, but now on the new premier Next- Generation GWAC” said Gregory Goldbach, SBD’s GWAC Program Manager. “This is truly a testament to our organization’s growth and maturity along with the dedication our folks have to help enable the government of tomorrow through our efforts on every program, every project, every day! GSA requested some tough requirements from a maturity standpoint and we are glad to have met them. We look forward to further utilizing our CMMI® DEV V1.3 ML3, ISO 9001:2015, ISO/IEC 20000-1:2011, 27001:2013 certifications and DCAA approved accounting system. We also intend to leverage the business partner relationships we have cultivated over the past 10 years, to deliver the best possible solutions to our existing and new federal clients.”

The Office of Management and Budget (OMB) has designated A2SB as the “best-in-class” solution for information technology services. The preferred Governmentwide solution gives government customers access to pre-vetted contract solutions, supports migration to mature and market-proven solutions, and increases available transactional and reporting data to optimize its buying behavior and budget.

“The award of the Alliant 2 Small Business contract is a major milestone that demonstrates GSA’s continuing commitment to small business and to providing federal agencies with the IT solutions they need to fulfill their critical missions,” said GSA Federal Acquisition Service Commissioner Alan B. Thomas. “As IT modernization takes center stage in the Administration’s drive to create a more efficient and effective government, GSA’s Alliant contracts will continue to be an important tool for agencies looking to enhance and improve their IT operations in service of American taxpayers.”

SBD's capabilities across distinct disciplines allow us to serve our clients’ broad range of requirements in support of their mission. Our diverse teams of subject matter experts work collaboratively with our clients, leveraging their mission and program knowledge, experience, and commitment to deliver excellence to address their unique needs. Unlike most small business peers, SBD has made the commitment necessary to both promote innovation and reduce management risk across our federal engagements. SBD's Innovation Center, Software Factory, and Task Order Management Portals are just a few of the innovations we leverage to support our commitment to facilitate research, replicate development environments, share knowledge, and reduce costs.
