

Solutions By Design II, LLC (SBD) understands that as the healthcare landscape continues to evolve with an aging population, cost increases, and focus on access to quality healthcare, federal health agencies face a multitude of challenges including cost control, legislative and policy changes, mitigating fraud, waste and abuse, harnessing an exponential data increase, and enabling access to quality healthcare. With these challenges arises a need for solutions and support at the intersection of healthcare, public health, research, and technology. SBD's Federal Health business unit possesses the business knowledge and experience coupled with program management best practice, innovation, and agility in the delivery of products and services as a partner to federal health agencies.

## Department of Health and Human Services

For CMS, SBD provides full spectrum development and implementation support in adherence with the CMS Expedited Life Cycle (XLC) process.

Services include:

- Design, development, testing, implementation, maintenance, and enhancement
- Maintenance of data collection processes
- Coordination and administration of release cycles, enhancements, refinements, bug fixes, data cleanups, special projects, and technical improvements
- Provisioning of architectural, design, and performance documentation

## Social Security Administration

SBD has performed full lifecycle development support for SSA. SBD has also created a new financial application called SMART which has allowed the Office of Retirement and Disability Policy to monitor budgets and perform forecasting based on current allocations and expenditures. This application has replaced the use of spreadsheets and allows for collaboration and real time updates of financial forecasting.

## U.S. Department of Veterans Affairs

SBD is part of the Government CIO SDVOSB Small Business Team and Information Innovators, Inc. (Triple-i) Large Business Team that have been awarded the VA T4NG Contract. T4NG is a Multi-Agency IDIQ Multiple Award Task Order contract. The program is worth up to \$22.3 billion.

SBD delivers information technology service solutions, including technical support, program management; strategy planning; systems/software engineering; enterprise network engineering; cyber security; among other IT- and health-related IT requirements.

SBD provides a consistent project structure that aligns the right people with the right resources which yields deliverables that meet or exceed CMS Business Requirements.

- CMS Contracting Officer Representative

Solutions By Design II, LLC (SBD) is a management consulting and technology services company serving clients domestically and abroad. For over 30 years, we have delivered technically innovative, reliable, and cost-effective solutions, services, and products, on-time and on-budget. We understand the challenges facing government agencies and help them transform to implement faster, more reliable quality systems. With more than 35 Federal contracts, SBD brings a demonstrated history of commitment to our customers.

### Business Process Management

Using Agile development methodology, we deliver analysis, design, prototyping and the day-to-day maintenance and enhancement of your business applications, helping reduce costs and ensure faster execution of programs, projects and other initiatives.

### Application Engineering & Maintenance

Our subject matter and technology experts, engineers, analysts and other professionals provide mission support to improve efficiency and enable you to achieve your strategic objective.

### Infrastructure Management

We provide infrastructure requirements, design, analysis support as well as network planning and metrics that support major system-wide projects including VTC, IPV6, cybersecurity, secure data center operations, network management, security, IV&V and information assurance services.

### The Innovation Center

The Innovation Center is a research and development environment aligned with the two leading Cloud Services providers: Microsoft Azure and Amazon Web Services (AWS). SBD ensures easy access to mainstream Operating Systems, Software Development Ecosystems, and Enterprise tools. This allows our client to prototype solutions faster and demo tools without expense.
